

# Perran & Riviere Sands Environmental Policy

Our aim is to protect, promote and maintain our natural environment.

Minimising impact both in our surrounding environment and on a larger scale, through education and engagement of guests and team alike, promoting ownership and personal responsibility, inclusion of environmentally conscious facilities and by integrating its concern for the protection of the environment into its development and management strategy.

**“An investment for our children!”**

- To involve and educate team, owners, guest sand the community in general, sensitizing them to the importance of adopting good practice, in terms of environmental protection and make them aware of the part they play in contributing to a sustainable future
- Work alongside and support environmental agencies and organisations. Adopting best practice procedures wherever practicable.
- Strive to continuously improve and demonstrate efficiency in the use of energy through training and effective management practices
- Minimise waste and promote recycling, across a range of materials by provision of facilities, team training and guest education.
- To ensure the rational use of water by adopting pro-active management strategies in relation to consumption and wastage
- To draw up and review periodically, environmental objectives and procedures, whilst promoting and measuring the continuous improvement of its environmental performance.
- Our Environment – Our responsibility.

**“Be the change you wish to see in the world”**  
**Mahatma Gandhi**
